

## OUR SOFTWARE

### Mac OS X

- Adobe Photoshop CC
- Adobe Illustrator CC
- Adobe InDesign CC

### Windows

- Adobe Photoshop CC
- Adobe Illustrator CC
- Adobe InDesign CC
- Corel Draw X3

## DATEIFORMATE

- Photoshop to version CC (\*.psd)
- Illustrator to version CC (\*.ai)
- InDesign to version CC (\*.indd)
- Corel Draw to version X3 (\*.cdr)
- Acrobat-PDF (\*.pdf)
- JPG-Dateien (\*.jpg)
- BMP-Dateien (\*.bmp)
- TIF-Dateien (\*.tif)
- EPS-Dateien (\*.eps)

File formats such as jpg, tif, eps, bmp; but please take care that the resolution of the original printing size is at least 400 dpi, otherwise it will be impossible to process your data! Please add a jpg, so we can prove the completeness of your data (a low resolution is enough).

## FONTS

Mac data should always contain the fonts used or information on them (e.g. name, ...). PC files need to have all fonts converted to paths.

## PICTURES & SCANS

If your file is containing embedded scans i.e., please add the original scan as a \*.tif or \*.eps file at a resolution of at least 400 dpi, otherwise it is not possible to work with your data.

## COLOUR

In the main, the colours used in ceramic screen-printing are full-tone. This means, you should define the colors used in your files as HKS-, Pan tone- or RAL-colors. Please add a colour proof of your artwork to avoid misunderstandings.

## DATA TRANSMISSION

- via CD/DVD
- via e-mail

## OTHER ARTWORK

The following artwork may also be realized by SAHM:

- printed matter in good quality
- photographs after consultation

All other artwork such as fax, copied fax, printed glass, low-quality, computer-prints can only be realized under vast time exposure, resulting in high costs.
